1= Excellent 9= Poor

Greatly reduces cyst nematode Race 3 reproduction- recommended to rotate with PI 88788 to stop cyst resistance.

\*No field or greenhouse data for BSR or IC. SNP marker analysis indicates no resistance for BSR and only resistance at one out of three markers for IC.

\*No field or greenhouse date for BSR or IC. SNP marker analysis indicates resistance for BSR and resistance at all three markers for IC.
